I started to have interest in criminal psychology when I watched a crime drama series which shows that there is a universal facial reaction to every feeling that humans can express. Judging from the title, I thought this book would be full of technical terms which will surely overwhelm me; surprisingly, it was written in a manner that a layperson could understand. It captured my interest from beginning to end. Aside from quenching my curiosity as to how a person could resort to violence and murder, it enlightened me on the impact of heredity and upbringing to an individual. I hope that people take their time to read this as this is timely and relevant.

This book asks a lot of interesting questions, leaving it open to debate and allowing you to form your own opinions on how criminals become how they are. Some of the main ideas raised are the Freudian concept of how criminals were raised leading to violent activity, and how triggers can later lead to violent bursts of activity. Despite this the book is very scientific in some ways; for example it goes further into explaining how the brain works and how behavior can be predetermined from birth in certain ways. Moreover, the final chapter explaining prevention methods to counteract criminal mindset opens up the debate further. My only con about this book is the formatting; some pages are blank because of this.

I like to watch crime shows and especially true crime stories these days, so I became very interested in how the mind of these killers work. I got this book just because of that. The book is not a professional, medical kind of textbook. It is written in plain language and it is very easy to understand for a beginner like me who knows next to nothing about psychology. I enjoyed reading it, it is really fascinating to see theories behind the killers mind and the way that they think. And kind of scary, too. I recommend the book, I liked it a lot. If you are interested in this kind of literature, it should provide you with some very interesting insights and it is fun to read too.

This book is very helpful. It is so hard to stay calm in this situation. Where danger is present anywhere. It is important to read this book because they put some strategies on how to handle ourselves in time of this. I like this book because I find it effective and informative. Also we have to understand the mind of the criminal to avoid making the crime worst. I am enjoyed reading this book I feel thrill and educated on how to defend ourselves in case of this situation came up.

I agreed with this book, that anyone could commit crimes, could be a violent offender or a killer. This book showed me the steps and strategies on how to understand what is going on inside the criminal mind and its nature. I also learned what causes them to snap and what can I do to stop this cycle. The information in this book stated to be truthful and consistent, it is also practical in our living. This world is full of crimes. So, this book could really help everybody to know the ins and outs of criminal psychology. One of the books I highly recommended.

This book is so interesting to me because it takes you into the mind of a criminal. Most of us don't understand the thought process of criminals. "Why would they just kill someone like that" we think. By understanding that there are triggers that can set criminals off, and knowing how they think, we can work towards preventing crime in society. Great read.

Criminal Psychology has always been one of my interest. I love watching crimes and investigation. It's interesting and intriguing at the same time. This book will provide you a better understanding on how a criminal think and what goes on through there minds. The author briefly discussed why they are the way that they are and what we can do to prevent the cycle. Discover what triggered them to arrive at the most horrifying event in their lives. This book is a great source of information. It's better to be aware and knowledgeable when it comes to this things.

A criminal is someone who has committed a crime, regardless if that someone gets caught or not. A crime is an act that goes against the law. By learning about and understanding criminal profiling, you'll be able to get inside the mind of a criminal. You can use this knowledge to make more accurate judgments of the people you meet. By understanding criminal psychology you learn to better trust your intuition, your gut feelings about someone you meet, and you'll be able to make better decisions whether to trust certain people. If you would like to get a better understanding of criminal psychology, you'll gain some insights from this book.
