Customer Reviews

This only looks like a book! The information inside could have been reduced to a pamphlet. I was very disappointed. Save your money, this can be learned by Googling each topic, of which there 8.

Author leaves a nice note saying to leave a nice review if you liked the book. Sorry, I just can't do that. Save your money and get something else. I'm seriously thinking about sending it back.

I rarely write reviews, but after reading this book I felt it necessary. This is simply not worth the \$3.00 you pay for it.....maybe .99, but for \$3.00 I would have expected more information and a more thorough explanation of the student side/teacher side as well as the various options that exist within each of the different assignment options, where files are stored, etc. You can get the same information watching youtube or using the help section in google.

Great overview, everything was simply explained. This is not an exhaustive how to guide, but it does give the reader a good idea of what the application can do for the teacher and the student. It reminds me somewhat of Blackboard. It's a good place to start.

Impressive book! My school district just started using google drive and google email. I got this book to share with the teachers to incorporate it with their classroom management. Tracking, posting assignments, grades, parent and student communication are just a few of the things you can do. I really think that the screen shots are very useful and great visual to help you understand how to do everything. Really worth recommending!

Cheap but still a ripoff. Just take the tour of the features on the website and you'll learn as much or more. I would give it zero if I could.

This book is suitable for someone who knows nothing about Google Classroom. It's not "everything you need to know." Disappointing.

This is fraud. Screen captures are blurry. Only a cursory overview. Avoid like Mersa or Zika. Very disappointed with this
