# Regional Liberalization In International Air Transport: Towards Northeast Asian Open Skies (Essential Air And Space Law)

## Synopsis

In this publication, the author examines the legal and policy aspects of air transport liberalization. While focusing on Northeast Asia, the central theme of the book is a regional approach to liberalizing the international air transport market. The author critically analyzes the legal barriers to air transport liberalization and highlights that regional approaches have emerged in most parts of the world. While noting that progress has been slower in Northeast Asia, the author prescribes solutions for Northeast Asian open skies. The author further emphasizes the role of airlines in promoting liberalization, arguing that airlines have become active reformers of government regulations. (Series: Essential Air and Space Law EASL, Vol. 17) [Subject: International Space Law, Aerospace Law, Aviation Law, Asian Law]
