I am a big Apple inc fan, whether its about laptop or cell phone. I always prefer to use Apple products like macbook and IPhone. But using IPHones is a bit different than using android phones. This book will give you a complete manual regarding usage of IPHones as well as tips and tricks to use this phone like a pro. A must have for IPhone users.

First of all, this isn't a book. It's a pamphlet. It took less than an hour to read it, cover to cover. It is useless. "Master your iPhone"? Don't make me laugh! I didn't learn even one, new, useful thing about my iPhone from reading it. Hands down, it was the worst purchase I ever made on ...

This book was a huge disappointment! It was only about 20 pages. I feel like I was robbed.

Good book for just basic instruction. Fast delivery! Thank you.

Little useful information, juvenile writing. No pictures to accompany the vague directions. I DO NOT recommend this 'Guide' booklet to anyone.
