# Human Psychology 101: Understanding The Human Mind And What Makes People Tick

## Synopsis

The human mind is a complicated array of wirings of the past combined with the physical and chemical inclinations of the present. Psychology is the study of the human brain, but it's so much more than a mere dissection of the gooey gray mass trapped in our skulls; it's a study of what makes us tick as individuals and as a species. Human Psychology 101: Understanding the Human Mind and What Makes People Tick is meant to show you the facets of a human being and how they work together to make a person tick. It's not a psychological treatise or a DSM-V. It's a collection of my own research on psychology and stories from my life and the lives of my friends and acquaintances that help illustrate the principles I'm going to be telling you about. I will be dividing this book into seven aspects of human psychology: emotions, personality, decision making, morality, perception, behavior, and relationships. To understand what makes someone tick is to have mastered a sort of psychological sleight of hand, and I hope that this book serves as a useful step on your way to mastery over that brand of magic trick. How human beings think and behave is an unendingly fascinating study, one that reveals how simple and elegant and, on the other hand, complex and mysterious we all are. I hope you are as pumped as I am to think about the inner workings of how people tick.

## Book Information

Audible Audio Edition

Listening Length: 1 hour and 33 minutes

Program Type: Audiobook

Version: Unabridged

Publisher: Make Profits Easy LLC

## Customer Reviews

I thoroughly enjoyed this book. For those interested in psychology its worth the short read. I rated 5 stars because I would read this again.

This is a great book if you're wondering about studying psychology. I really enjoyed it as I am sure others will as well

Great insight into what you might know but don't practice. The knowledge in this read is a powerful tool to possess.
