The Big Book Of Japanese Giant Monster Movies: Vol. 1: 1954-1980 (Volume 1)
"What's this?" you ask, "Another crudely fan produced book of reviews and boring synopses of Toho's Godzilla films?" Not quite, if you're a seasoned Godzilla fan like the author eager for new information on old classics, this is in fact the book for you. Not only does it cover Toho's dai kaiju eiga (even the rarely seen Daigoro vs. Goliath), but for the first time in America offers reviews, trivia and detailed production information on all of Daiei's classic Gamera films, Toei's Legend of Dinosaurs and Monster Birds, and even the Shaw Brother's Mighty Peking Man to name a few. Still think you already know it all about Japanese giant monster films? Did you know that King Seesar originally had horns and was named King Barugan? Or that Tadao Takashima refused to fly to Guam for on location filming for Son of Godzilla? Or that Katumi Nimiamoto, who played Titanosaurus in Terror of Mechagodzilla, was also the acrobatic hero of Ultraman Leo on TV? Don't know who Tadao Takashima or Katumi Nimiamoto are, don't worry this book will tell you that too. If you think you've already read every good book on Japanese Giant Monsters think again.Wait there's more!!!!

This book also offer bonus entries on non-kaiju films like Battle in Outer Space, Toho's Hammer horror inspired "Bloodthirsty Trilogy" and TV's Agon the Atomic Dragon to name only a few. What other authors are saying about The Big Book of Japanese Monster Movies: "John LeMay's wonderful The Big Book of Japanese Giant Monster Movies Vol. 1 (1954-1980) is a love letter to all those great Showa Era sci-fi, fantasy, and horror movies from the Land of the Rising Sun. LeMay's enthusiasm is contagious, his prose pumped, his insights enjoyable. And besides all that, LeMay offers great trivia about these movies, some of which even an oldster like me didn't know! Highly recommended nostalgic fun for new and old fans alike. Now I can't wait for Volume 2!" --Mike Bogue, author of Atomic Drive-In "John LeMay has done it again! The Big Book of Japanese Giant Monster Movies is loaded with fun facts, well written reviews and loads of interesting historical footnotes and trivia. John has this informal yet formal writing style that makes the book a breeze to read and yet well layered as well. I kind of hate him for making it look so easy! I highly recommend this book, and hopefully it will come out in a non-digital edition for us old fogsies that like to hold actual books when we read them!" --David McRobie, Editor of Xenorama Magazine "With The Big Book of Japanese Giant Monster Movies, LeMay takes fresh look at the daikaiju genre, providing both critical analysis and interesting behind the scenes information on the making of these films. Fans of the genre will find all the usual Godzilla and Gamera films here, along with many lesser-known genre entries finally getting their due." --Martin Arlt, Editor of Mad Scientist Magazine "As a lifelong Godzilla fan, I count among my most cherished
memories having attended an all-night marathon of the Showa period films at a South Texas drive-in theater in the early 1970s. Over the years, the Godzilla myth, in its many variants, has continued to entertain and delight me and my family. Consequently, I was thrilled to discover John LeMay's The Big Book of Japanese Giant Monster Movies Vol. 1, which provides an outstanding overview of Godzilla and his monstrous film cohorts. The book is incredibly well organized and, when loaded onto a mobile device, is the perfect companion while one watches these historic films. I love the trivia, the film summaries, and the effort John makes to provide historical and cinematic context for each of the motion pictures. I heartily recommend this wonderful book for all fans of Japanese monster flicks. The only thing missing is the popcorn ...."-Noe Torres co-author of Mexico’s Roswell: The Chihuahua UFO Crash

Why another Godzilla book you might ask? The answer is simple: While in Japan there are numerous books on the Big Guy, here in America...not so much. Back in the 1990s and 2000s were produced some excellent Godzilla books (all of which I LOVE) by Stuart Galbraith, Steve Ryfle, August Ragone, J.D. Lees, Marc Cerasini, David Kalat, Ed Godziszewski, and fairly recently new tomes by Peter H. Brothers and Sean Linkenback. So what sets this new book apart? Unlike many volumes to focus squarely on Godzilla, this title will also teach you the history of Daiei’s Gamera and Daimajin films as well as the inspiration behind Toei’s The Magic Serpent and Legend of Dinosaurs and Monster Birds to name a few others. And as a fan, I know what other fans
want, namely new information on old favorites. And I feel confident on that front that this book will succeed. But don’t take it from me, just look at what I paid some of my friends...wait...I mean just look what some serious authors (who I do not know very well) said about my book in those review quotes. All kidding aside though, I had a blast writing this book, and if you’re a fan of the Dai-Kaiju genre I have no doubt that you will enjoy it as well. For instance, I won’t insult your intelligence and ask, “Did you know Godzilla vs. the Sea Monster started off as a King Kong movie?” Of course you did, everybody knows that by now, but did you know Noriaki Yuasa’s favorite scene in Gamera vs. Barugon is when the titular foe hatches from his egg? Did you know Toho served “Mothra Eggs” in the cafeteria during filming of Mothra? Did you know King Seesar’s reflective eyes were made from the taillights of a car? Did you know that the titular terror from Gappa the Triphibean Monster owes his design to the early stages of TV’s Ultraman? From one fan to another, I hope you like the book!

John LeMay is the author of numerous history books on the history of the Southwest, among them Tall Tales and Half Truths of Billy the Kid and The Real Cowboys and Aliens: UFO Encounters of the Old West. More importantly though, LeMay is a lifelong Godzilla fan and a frequent contributor to G-Fan, Mad Scientist, Xenorama, and Cinema Retro.
