# Medical School For Everyone: Pediatrics Grand Rounds

## Synopsis

Pediatrics, which focuses on the medical care of children from birth through adolescence, is one of the most fascinating areas of modern medicine. To step into the shoes of a trained pediatrician is to better understand how these medical heroes diagnose common and uncommon illnesses in their young patients, helping each child grow into his or her greatest potential. In these 24 lectures, don the doctor's white coat for an accessible journey into the world of pediatric medicine to solve medical mysteries. Each of these standalone lectures presents you with a case or series of cases that you tackle alongside Dr. Benaroch, from initial symptoms and workup to the diagnosis and resulting treatment. You'll quickly see just how multifaceted and nuanced the medical treatment of children is, whether dealing with minor diagnoses like runny noses and ear infections or life-changing ones like cerebral palsy and neonatal pneumonia. But sometimes children have concerns that extend beyond the traditional realm of medicine. In addition to the fascinating facts and compelling stories he shares, Dr. Benaroch has crafted the perfect tool for parents and caretakers who want a panic-free resource for their child's health and wellness, including issues surrounding sleep, discipline, and mental health. Whether he's dealing with a premature infant, complications arising with international adoption, or a homeless youth, Dr. Benaroch treats every case in this course with care and compassion. You'll quickly learn how the best pediatricians are also caretakers and counselors and why the experience of helping sick children is exciting and rewarding - especially when it transforms lives for the better.

## Book Information

Audible Audio Edition

Listening Length: 12 hours and 4 minutes

Program Type: Audiobook

Version: Original recording

Publisher: The Great Courses

Audible.com Release Date: April 15, 2016

Language: English

ASIN: B01E96DMC8

Best Sellers Rank: #5 in Books > Education & Teaching > Higher & Continuing Education >

Medical School Guides #8504 in Books > Audible Audiobooks

## Customer Reviews

This is my book suggestion of the day. I did it as an Audible audio book - and it is a good intro to the

value of audiobooks (good narration). This was the third I have done by this author, and I am a pretty big fan. It is part of Audible's "Great Courses" series, which is formatted like a series of lectures you would see in a college or grad school environment (only no homework or tests, and you only listen to what you want to listen to). The ones this author did are meant to replicate "rounds" that med students and interns might do... going patient to patient and reviewing the history and complaint and working through the possibilities to a diagnosis and treatment. Dude is a pediatrician, and he is very good at explaining things at the right level - not condescending (don't shake a baby) and not so technical that you need an organic chemistry background to follow him. I think this is in the top 3 most useful kid/baby/pregnancy books I have come across - explaining with some context what is worth a peds appointment, what is worth a trip to the ER (ED), and what is worth a 911 call. I think it's a must if you're a parent, a teacher, or interested in medical and first aid stuff. If you hate kids and want nothing to do with them - check out his Emergency Medicine book or his general Grand Rounds book. As a bonus, he doesn't just talk about fevers and colds, but a pediatrician's eye view of good parenting and rule enforcement, and how to handle the curveballs life and kids throw at you.
