## **Customer Reviews**

This book delivers exactly what it promises to deliver and then some! I have been intrigued by the idea of falling off of the radar for some time now, and this book gives a clear, effective, and most of all LEGAL means of doing so. I have avoided many books out there for fear that they were going to try to hawk some special new identity in 3-easy-steps program, and I'm glad I started here. What I really enjoy about this book is that it keeps the information simple, straight-forward and concise. It clearly lays out the problem, and clearly communicates a solution. What makes this book go from good to great is the wealth of links to the many free resources available out there. This book is not

exhaustive, but it is the very best first step anyone can take as far as I can tell! I highly recommend this book!

This is the only book you need on protecting privacy and security. Tons of great tips and information in here, including step-by-step processes on how you can create a new life as a businessperson and stay anonymous. There are lots of other great resources that you shouldn't pass on. If you get this book, you won't have to look anywhere else. The contents itself costs more than what its worth now. So if you want to go invisible, I'd recommend looking into David Author's book.

You've taken reasonable actions to protect yourself and loved ones in a crises or you want to do so. How do you protect you, yours, and your preparations from being discovered, seized, or looted. This book is how and all Preppers who want to keep and protect their preparations should read it. You can even take it to the limit and completely disappear from the radar of Big Brother and every other invasive entity out there. Definitely recommended reading!

The book showed me how to protect all of those expensive preps. Now me and my preps are hiding in plain sight. The process is simple and all you have to do is follow the process the author clearly explains and click on the provided links so you too can become an "Invisible Prepper". This is NOT exactly what I expected it to be ... It was so much more! Every Prepper should read this book and it is HIGHLY RECOMMENDED. Thanks Mr. Author!

If you have made preparations for a disaster event, you need to hide those preps from Big Brother, and every entity. This book tells you how to become invisible in todays invasive environment and be safe from those who would invade your privacy, take what you have, or even attack you for being a Prepper. Preppers are less than two percent of the population and this book can show you how to hide from not only Big Brother but the 98% who would want what you have in a crisis be it man made or from Mother Nature. Why not become invisible when it is so easy to do? Thanks Mr. Author for this eye-opening book that taught me so much. 5 stars and more if I could for this awesome book that gives you a sensible and amazingly simple process to follow.

This is not the ordinary prepper book on what you need to survive a crisis. The Author tells you how and why with step by step instructions ... To disappear from invasive government agencies, social media, dangerous individuals, etc. The best guide on how to disappear, not be findable, and

invisible for the safety of yourself, your loved ones, and your preps if the brown stuff should hit the fan. J. J. Luna's books are good but David Author is far better for those who truly wish to become invisible.
