Customer Reviews

This e-book covers all the directions and tips for him who is interested to make lotions at home and profiting from it. People are becoming more and more aware of the risks they run with regular

cosmetics and skincare products and are increasingly turning to alternative solutions and in this perspective homemade lotion is one of the best solutions. Natural lotion doesn't contain preservatives. After reading this book you will find that lotion making is fairly easy just following the guidelines of this book. This e-book is very instructive and helpful.

Homemade oil, soap and lotion are my favorite past times at home, I feel relaxed doing these hobbies because of the scent that I get to smell. So that is the reason why I downloaded the book, I am very interested to learn more recipes. And with this book, yes, it greatly appeals to me as a beginner. Tools and equipment were discussed, as well as legalities when turning it into a business and that is a great information. Though there are only a few recipes, I hope the author can make another book with plenty of recipes and ingredients.

Rosy Shea Lotion is very useful and one can easily prepare it. Melt the jojoba oil with shea butter and almond oil in a double boiler then refrigerate it for few mins. Once the time is up, add in the essential oils and whip the mix with a hand mixer until you get a creamy mix. Transferring your lotion to a mason jar and apply it whenever needed. This lotion will moisturize your skin and prevent it from drying.

The very special thing the author has introduced and that is beauty homemade lotion. Normally we purchase from outside lotions but didn't find worth while as our demand and didn't effects. This guide book helps through proven tips and strategies in making your own lotion products and can start business of selling these product also. I would like to recommend this book to all, must avail this opportunity!

Exciting new topic which made my day interesting and productive! This book is good source of knowledge if we want to know how to make lotions at home and profiting from it. This good for beginners who has no experience with this kind of activity for it has a step-by-step process on how to make the lotions.

Homemade lotion can save money and help you avoid toxic chemicals. This is truly an interesting reference since it also offers a good business opportunity. Making your own handmade lotion for the first time can be intimidating. If you've never made lotion before like me, I would recommend this book. Once you have a grasp on the basics, you may be interested in formulating a customized

lotion recipe. The great thing about creating a lotion recipe is that you can customize it to be the texture you love. The texture of your lotion will depend on the proportions of each ingredient and the type of emulsifier and oils. Remember, just like any bath and beauty project, making your own lotion all depends on personal preference. It can sometimes take a little trial and error to find the perfect formula for your skin type, but that's half the fun.

The recipes are easy to follow and don't have you going out to buy a lot of crazy gadgets, just use what you have already in your kitchen! With a few simple, pure, and inexpensive ingredients you can create lotions that are better and more effective than those you buy right now. And best of all, they are safe for your skin! The variety of ingredients you find means you can choose which lotion or cream to start with and then make others; for yourself, for gifts or even to start selling your own brand of homemade lotions! I love to learn new things and this is something that I really want to learn more about. The recipes are easy to make and the ingredients easy to find!

I am allergic or sensitive to most lotions, so finding a book with easy to follow instructions for making my own was a great find. My favorites are the Shea butter recipe and the peppermint. Very soothing to the senses and I love how soft they make my skin. Great book. I especially like the explanation in the beginning about what not to use and why. Very helpful. I had no idea that shea butter was from a nut oil. The list of good products was very helpful also. The recipes are wonderful, lots that I will use, the adult insect repellent for one. I love this book and have tried some of the recipes already. It's very informative about each and every ingredient in the book.
