I have always been wondering why people dream and if this dream has any significance on our life. It says here that dreams may be a part of our emotions where our mind release what we have been hiding when we are in the state of meditation and our body and muscles are more relax which I guess is little bit true. But it's not only about that. This books says more about dreams that we have

never think of before. But what's more interesting are its interpretation. I have always wanted to understand what I have been dreaming as I believe it has something to do with what's going on with me and what might happen in the future.
