Most people do not "grow out" of Attention Deficit Disorder (ADD) or Attention Deficit Hyperactivity Disorder (ADHD). For many, their ADHD traits have led to difficulties in school, relationships, and work. But for our hunter-gatherer ancestors these characteristics were necessary for survival. Hunters must be easily distractible, constantly scanning their environment, and unafraid of taking risks. When humanity experienced the agricultural revolution 10,000 years ago, a vastly different type of personality--the methodical "Farmer"--became dominant. Most of our modern world is tailored to this Farmer personality, from 9-to-5 jobs to the structure of public schools, leaving ADHD Hunters feeling like unsuccessful outcasts. However, the Hunter skill set offers many opportunities for success in today's Farmer society--if you learn how to embrace your ADHD traits instead of fighting against them.

In this step-by-step guide, Thom Hartmann explains the positive side of Hunter behavior. He reveals how Hunters make excellent entrepreneurs, sharing ADHD success stories from Fortune 500 CEOs, inventors, small business owners, and his own hands-on experience in launching new businesses. Drawing on solid scientific and psychological principles, he provides easy-to-follow organizational strategies, tips to maintain focus and create a distraction-free workspace, and tools to set goals, build a business plan, and discover the right business project to keep you motivated. Hartmann shares valuable advice for both the Hunter entrepreneur and the Hunter within an existing company and for curtailing the aggressive side of the Hunter personality in group situations or manager positions. Revealing the many ADHD opportunities hidden within the challenges of work, relationships, and day-to-day life, Hartmann also includes tips on navigating family relationships and parenting--for most Hunter parents are also raising Hunter children.

I love a book that turns everything I thought I knew upside down. What if we truly are still â œhuntersâ • learning to adapt in a â œfarmerâ™sâ • world? Thereâ™s nothing wrong with being the â œfarmerâ • because this is what creates and sustains stability. But without innovation and creativity, stability can quickly become stagnation. As hunters, we were constantly scanning our environment for food and danger. In todayâ™s world, the hunters scan their environment for danger and opportunity and are brave enough to make changes. This book provides very useful steps that will help us turn what we are told are disorders into attributes. This is an important book for business owners and/or entrepreneurs. Dhara lemos, Lotus Guide
