As a retired therapist, I find much of this book applies just as well to life in general as it does to the practice of psychotherapy. Granted, it's a slow read. These authors don't tell us what to do, they don't tell us what is or is not ethical. They ask us questions--they challenge us to think. I find myself needing to stop for a while to ponder a question or two. There's a thought-provoking exercise on pp. 55-57--three pages of explanations we humans use to justify the actions we're not very comfortable with. For example, "It's not unethical as long as a managed care administrator or insurance care reviewer required or suggested it. . . . It's not unethical as long as no law was broken . . ." Seeing these justifications in print is, well, thought-provoking.

Excellent practical guidance for students entering the field. Scenarios for discussion and thought are especially useful in class. So glad they included the chapters on the American Psychological Association's ethical failures.

Very well written and understanding of the complexity of ethics.

GREAT book. All you need to augment the AAMFT and ACA codes.

Excellent read!
