I have read so many books on weight loss and healthy diet but this one is quite unique and different because the author proved that you don't have to spend too much on expensive healthy diet recipes, but you only have to be knowledgeable on the ingredients and the nutrients you need for you to create a low carb diet without worrying to get fat and gain weight.

I really love the idea of one pot cooking because it really saves time and energy specially for working moms like me. This book provides recipes using this cooking method but adopts the low carb diet. I find it very suitable for me and my family since we have history of diabetes and I want to prevent it as early as now. The recipes provided in here are simple and easy to do yet seems to be delicious. I think I won't have a hard time following the procedures provided in here because it was laid in simple manner. I am really excited to try the recipes here this weekend.

This book gives you a flexibility to eat a considerable measure of delectable nourishments without fearing putting on weight. I cherish it, and would prescribe it to Beginners who need to Rapid Weight Loss.

This book provides a well planned recipes to help one start with the low carb diet. The recipes are easy to follow, the ingredients are easy to obtain. On this book you can find 50 Original One Pot Meals On A Budget-Save Money which are amazing.

I am a fan of food, I just really love eating and cooking. But since I moved out from my parents house, it has been very difficult, and the adjustments are just really hard. One of the things I miss is cooking anything I want and eating anything since my parents are the one who buy the ingredients but now that I have a limited budget I seldom cook meals that I want. But with these books, some of my favorites are included but I was amazed that it has lesser cost. This book will indeed have a place in my kitchen. Thanks for this.
