# Build A Survival Safe Home: Over 40 Helpful Tips On How To Construct A Protected Shelter And Defend Yourself And Your Family From Natural Catastrophes ... A Survival Safe Home Books, Survival Home)

## Synopsis

It was once said that your home is your castle. Though this may not be the case anymore it is still the place that many will choose to batten down the hatches when things go wrong. This can be a double edged sword as either being your best or worst solution. Defending your home may be no easy task, if you have a home to return to in many cases. Shelter is one of the three most important survival needs, without it we would be vulnerable to the elements, human predators, natural disasters and animals. We often take our homes for granted, they are our sanctuary in many ways and we always expect them to be there when we return. It's often the idea of the home being a sacred fortress that leads people to get killed because they don't realize how vulnerable their home is or plan what to do if it was gone. When you don't have a home to return to you'll need to have the skills to build something to keep you and your family safe. Simple shelters might help keep the rain off your head but will be useless against thieves and animals. Anyone with camping experience can tell you that the average tent isn't built to withstand much. Your home is your safe place in so many ways, but when SHTF how safe is it really? The average house isn't very safe and simply assuming your locked door will keep everyone else is extremely naïve. Let's look at different ways of making it safer and what happens if you can't go home again. Here is what you will learn after reading this book:  
Your homes Weakest Points  
Home Advantage  
Firearms for home safety  
If you can't go home  
Extreme weatherproofing your home  
Getting Your FREE Bonus

## Customer Reviews

Disclosure: I received this PDF book for free in exchange for your honest review from Bookeza Review Club. We've allowed the powers that be way too much wiggle room and now if we're smart, we'll at least make ourselves aware of what to do for ourselves and our loved ones in the event all those youtuber's make valid points. This nice book by Kimberly Lee touches on numerous ways to RE-BUILD your current home with simple techniques to make it a safer place to be. Chapter Two is my personal secret fear, and it was pleasant to read some low cost ideas to help prevent the destruction possibilities to home, life and limb.

I got this book for free in exchange for my honest review. This book briefly reviews preventative measures and planning for protecting your home from natural and human invaders. It is an easy read and a basic start on planning how to best defend your home.

Great advice, a lot to plan for in case of an emergency. The book touches on SHTF, wildfires, floods, tornadoes. .

Another good DIY book for my library - you can NEVER have too many - - -
