In the early decades of the 21st century, community college leaders find themselves navigating troubled waters, trying to steer a leaking ship over rough shoals. While no longer blind men driving on freeways, the women and men leading these colleges do not have a clear course to a safe harbor. The numerous external and internal forces battering their vessels are not abating. Now along comes Practical Leadership in Community Colleges: Navigating Todayâ™s Challenges, a new book by George Boggs and Christine McPhail. These two nationally known community college leaders have provided the field with a navigation system to help leaders chart a new course. A real strength of the book is the emphasis on confronting the troublesome issues facing these leaders. The book begins with a thorough analysis of how leaders should recognize, analyze, and deal with the issues of the day. The remainder of the bookâ™s chapters contain valuable information about the arenas in which these issues arise. The use of issues to consider and case scenarios at the end of each chapter provides community college leadership groups with the ability to use this book as a âœlearning toolâ• to deal with issues at the local level. Our nationâ™s community college leaders will never sail on a sea of glass. They will always require assistance with their journey. This book is the sextant of our time. As someone who has worked for and with community colleges for 49 years, I find Practical Leadership in Community Colleges both refreshing and timely. It is unlike other community college leadership books, in that it takes a managing issues approach to navigating community college problems.
